## FOR WESTERN WISCONSIN COUNTIES

Buffalo, Crawford, Jackson, Juneau, La Crosse, Monroe, Trempealeau, & Vernon

May 2005

## Seasonal job growth causes plummeting unemployment rates

All eight of the counties that make up Western Wisconsin reported declines in their April unemployment rates, as compared to the previous month. Leading the charge was Jackson, dropping 2.1 percent from March's 7.7 percent to a rate of 5.6 in April. All eight counties in Western Wisconsin experience seasonal fluctuations in their monthly unemployment rates. Jackson's seasonal fluctuations are especially pronounced because of the strength of the county's tourism, recreational services, and heavy construction industries. These three industries are especially dependant on weather and season.

Monroe County's April unemployment rate of 3.6 percent was down one full percent from March's rate of 4.6 percent. Monroe's April rate was the third lowest unemployment rate among Wisconsin's 72 counties, only Dane and Ozaukee had lower rates in April. Various business activities, some of it related to Fort McCoy and its important role in Monroe County's economy, were responsible for the county's low unemployment rate in April.

The La Crosse MSA's unadjusted April unemployment rate was 3.7 percent, dropping one percent from March's reading of 4.7percent. In April, the La Crosse MSA had the second lowest unemployment among Wisconsin's 12 MSA's, only Madison, at 3.2 percent had a lower rate in April. Seasonal employment increases in the trade, construction, and leisure/hospitality industries assisted in pushing down April unemployment rates in the La Crosse MSA.

All but one of the state's 72 counties posted a lower unemployment

rate in April as the State of Wisconsin rate, not seasonally adjusted, dropped 0.8 percentage points to 4.7 percent. Seasonally adjusted the state rate in April was 4.5 percent.

Nationally, the number of workers involved in mass layoffs rose in April to a seasonally adjusted 136,837, up 5,989 from 130,848 workers who filed state unemployment insurance claims as a result of mass layoffs in March, according to figures released by the US Labor Department's Bureau of Labor Statistics. Nonfarm employers initiated

Statistics (BLS) produces monthly industry embloyment level estimates for La Crosse County Wisconsin separate from Houston County Minnesota. Official monthly employment-by-industry estimates are only computed for these two counties combined (the federal definition of the La Crosse MSA). This publication will continue to provide unofficial monthly employment-byindustry estimates for La Crosse County based on imputed averages. In this publication, where a data set is labeled "La Crosse MSA" the data is for the two counties taken together. Where a data set is labeled "La Crosse County", said data is for La Crosse County only.

Labor Force Estimates (Unadjusted)

Note: All estimates are preliminary and based on place of residence.

\* La Crosse MSA Statistics include Houston County Minnesota

1,274 mass layoffs last month, an increase of 80 from March, when there were 1,194 such events. In April, manufacturing firms accounted for 395 events and 63,121 related UI claimants. Both figures were higher than a year earlier, when there were 360 manufacturing layoffs and 43,158 related UI claimants.

**Reminder:** Officially, neither the Wisconsin Department of Workforce Development (DWD) nor the US Bureau of Labor

**Note:** As of January 2005, seasonally adjusted unemployment data is no longer available for sub-state (MSA) levels. Statewide and National unemployment rates continue to be available on both a seasonal and a non-seasonal (unadjusted) basis.
